

SAFETY AND HEALTH POLICY STATEMENT

SAFETY and HEALTH POLICY

Clean Energy Distribution management recognises and accepts the commitment to provide a safe and healthy environment for its customers, workers, the public, and for the protection of property.

Health and safety at work is both an individual and shared responsibility of all employees and is constantly reviewed and improved through regular consultation. Managers and employees regularly meet on both a formal and informal basis to interact on all issues pertaining to health and safety. The following areas of responsibility are essential to the success of the policy.

1. MANAGEMENT

Management shall actively pursue these goals by:

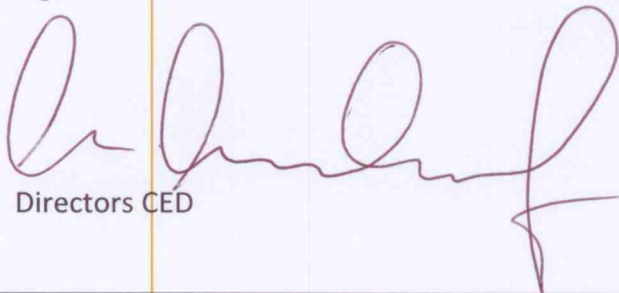

- formulating and administering a comprehensive safety and health programme to satisfy the requirements of all applicable Acts and Regulations.
- holding regular senior staff meetings to discuss safety and health performances.
- taking action to provide appropriate training and resources to maintain a safe and healthy environment for all employees, customers and the public.

2. ALL EMPLOYEES

All employees have a duty to take care in their actions, to the limit of their capability. The success of a health and safety programme ultimately rests on all employees assuming responsibility for their actions.

Reducing disease and minimizing accidents and the related insurance costs will enable the company to be more competitive, thus helping to safeguard jobs.

Signed

Directors CED
